IMAGING CENTER TEAMS

THE FIRST LEAK

Where do your referrals go?

A five-slide look at how orders get lost before they are orders.

THE LEAK

A referral can be lost before it ever becomes an order.

The doctor sends it somewhere else, or the fax sits in a tray until someone keys it in.

WHY IT HAPPENS

Three things hide it from you

1. You can't see which doctors stopped sending.
2. Orders arrive by fax, email, upload and portal, and someone keys each one.
3. Missing details mean phone calls back to the referring office.

WHAT GRAVITY DOES

One fix for each

Gravity Grow

Shows who refers, who sends elsewhere, and runs outreach to win them back.

Gravity Referral

A portal for referring offices with live order status.

Gravity Doc

Reads each fax and drafts the order for your team.

See where your orders leak.

Free 30-minute Order Trace. Bring one order from last week.
