THE THIRD LEAK

Does every exam you scan get paid?

A five-slide look at denials that were visible before the scan.

SWIPE →

THE LEAK

The scan is done. Then the claim is denied.

Or the patient disputes what they owe. The problem was there when the patient booked.

WHY IT HAPPENS

Three late discoveries

1. Coverage checked late, or not at all.
2. The prior authorization is missing at the scan.
3. The patient learns their share after the visit.

WHAT GRAVITY DOES

One fix for each

Gravity Estimate

Checks coverage and texts the patient their estimated cost.

Gravity PriorAuth

Submits and tracks authorizations on payer portals.

Gravity Pay

Collects the patient share at booking, by phone or at the desk.
