AlphaNodus

GRAVITY MODULE

Gravity Grow

Referral management

What it does

The CRM that keeps referrers sending, and wins back the ones who stopped.

Highlights

- Referrer record: an NPI-checked record of every referring provider, kept current from the national registry
- Market intelligence: every physician in your market who orders imaging, including those sending orders elsewhere
- Flags referrers whose volume is rising or falling

AlphaNodus

GRAVITY MODULE

Gravity Referral

Referring physician portal

What it does

Find the right imaging center, place the order in one step, and get the report back the day it's signed.

Highlights

- Upload the order once; it becomes a digital order with nothing to retype
- Live order status: received, pending, needs information, authorized, booked, completed
- Told right away what an order still needs

AlphaNodus

GRAVITY MODULE

Gravity Doc

Fax intake and order entry

What it does

Every document is read, filed and turned into a complete order.

Highlights

- Reads the fax, finds the patient (or creates one for review) and creates the order
- Draft order entry: the form arrives filled in so staff review and confirm instead of typing
- Split multi-patient faxes, reorder and rotate pages without leaving the viewer

AlphaNodus

GRAVITY MODULE

Gravity Booking

Patient scheduling

What it does

The exam is booked in the right slot, on the right device, the first time, and schedules stay full.

Highlights

- Booking rules checked on every booking
- Exam booking and schedule templates
- At Downtown Radiology, patients made 43.8% of bookings in September 2026, up from 19.7% in the first month

AlphaNodus

GRAVITY MODULE

Gravity Visit

Patient portal and check-in

What it does

The patient arrives booked, prepared, checked in and paid.

Highlights

- Patients book from the app or by chat; an AI voice agent can book by phone under the same rules
- Digital forms, filled in once
- Patients can move an appointment from the same link

AlphaNodus

GRAVITY MODULE

Gravity Greeter

Check-in kiosk

What it does

Check-in at a lobby tablet, not a line at the desk.

Highlights

- One tablet per location, in the lobby
- Scan a license and the appointment comes up; manual entry is the fallback
- Same check-in as on the patient's phone

AlphaNodus

GRAVITY MODULE

Gravity Estimate

Eligibility and patient estimates

What it does

Coverage and the patient’s share are known before the exam.

Highlights

- Coverage verified before arrival, without calling the payer or using a portal
- Shows copay, coinsurance, deductible and out-of-pocket remaining by network tier
- AI picks the benefit line that fits each exam, for one-click patient responsibility

AlphaNodus

GRAVITY MODULE

Gravity PriorAuth

Prior authorization

What it does

Every exam that needs a prior authorization has one.

Highlights

- Rules say which exams need one for each payer and code
- Each authorization sits on the order with its status, number and dates
- Iowa Radiology: 80%+ of authorizations go through Gravity; a backlog of about 430 orders was gone by day 4

AlphaNodus

GRAVITY MODULE

Gravity Pay

Patient payments

What it does

The patient’s share is collected when the exam is booked, before the visit or at the visit.

Highlights

- Patients pay before they arrive, from their phone, with no login
- Card, cash, check or card reader at the front desk, with an automatic receipt
- Card payments go straight onto the order

AlphaNodus

GRAVITY MODULE

Gravity Communication

Calls, texts and faxes

What it does

Voice, chat and document, built into Gravity.

Highlights

- Every channel in one thread on the order and the patient
- Calls, texts, chats, emails and faxes together
- Scale on Gravity each month: 2 million texts, 1.2 million faxes, 500,000 emails, 200,000 calls

AlphaNodus

GRAVITY MODULE

Gravity Flow

Workflow automation

What it does

Thousands of ready-made flows, installed and running the same day.

Highlights

- Any event in Gravity can start a flow
- Routine work just runs; agents do the work that takes intelligence; people review or handle exceptions
- 10 million automated flows run every day

Source: alphanodus.com/products/gravity-flow

AlphaNodus

GRAVITY MODULE

Gravity Work

Worklists

What it does

Puts each piece of work that needs a person in front of the right one.

Highlights

- Work is assigned on arrival, up to each person’s capacity and skill
- Worklists for calls, documents, orders, referring providers and patients
- Semantic search finds work by meaning, even handwritten documents

AlphaNodus

GRAVITY MODULE

Gravity Trust

Access and audit

What it does

Controls who can get in, what they can do, and records what was done.

Highlights

- Single sign-on: staff use their existing work accounts, and IT keeps control of access
- User groups and permissions: each person sees and does only what their job needs
- An audit trail of every change

AlphaNodus

GRAVITY MODULE

Gravity Insight

Analytics and KPIs

What it does

See how the center is running without exporting a spreadsheet.

Highlights

- Dashboards for orders, documents, booking and flows
- Per-user dashboard access
- Dashboards can be emailed on a schedule you set
