AlphaNodus

TRUST

Security and control

What we can say today, and where to find the rest.

You decide how much a person reviews

For order intake, review every order or only the unusual ones. For authorizations, review every run, let it finish on its own, or turn it off.

Every step is logged

Changes, communications and automated runs are logged, and each order has a timeline.

What we don't do

Gravity does not read the scan or write the report.

> For certifications and policies, see the Trust Center on alphanodus.com. This sheet states only what the website states.

Confirm before publishing. No certifications are claimed here.
