

A NEW CATEGORY

**Your RIS records
the work.**

**An AOS does the
work.**

Agentic Operations System, in six frames.

Swipe →

A RIS is a system of orders.

An RCM is a system of claims.

An AOS is a system of work.

WHAT IT DOES

The work between the screens.

- Holds the phone call
- Reads the handwritten fax
- Works the payer portal
- Decides what happens next

WHAT IT DOESN'T DO

It doesn't touch the image.

- Read the scan
- Write the report
- Store the images

**Routine work drives
straight through.
People take the exit
ramps.**

The ambiguous fax. The patient who wants
to argue. The payer behaving strangely.

**Get the order.
Complete the exam.
Get paid.**

Gravity, the Agentic Operations System (AOS) for imaging.
