

Where did that referral go?

SWIPE TO SEE WHERE

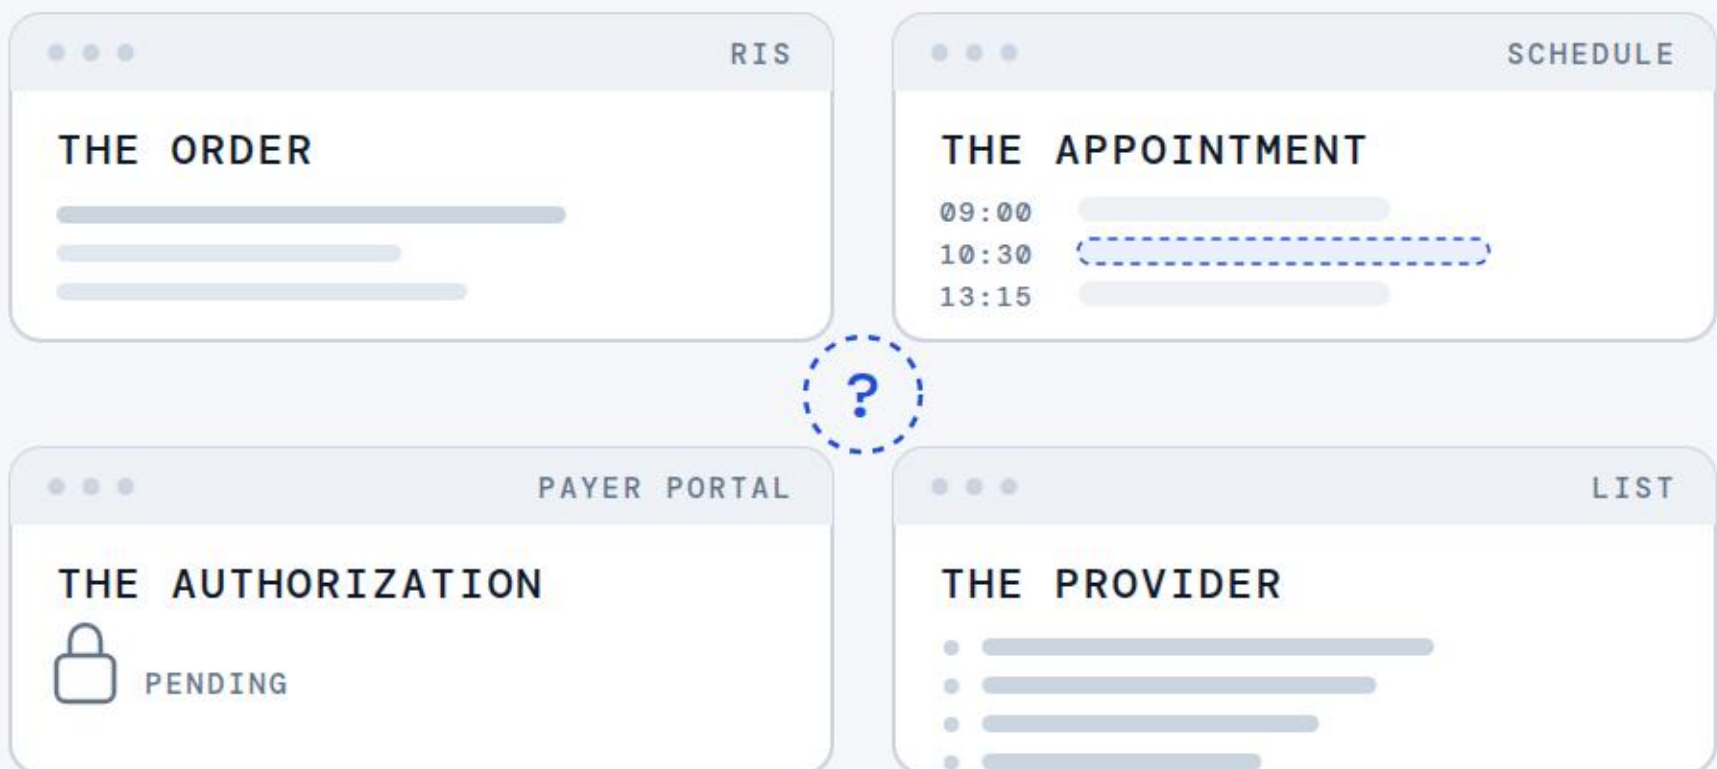

• — WITHOUT GRAVITY

The answer lives in four places.

The order in the RIS. The appointment on the schedule. The authorization in a payer portal. The provider on a list.

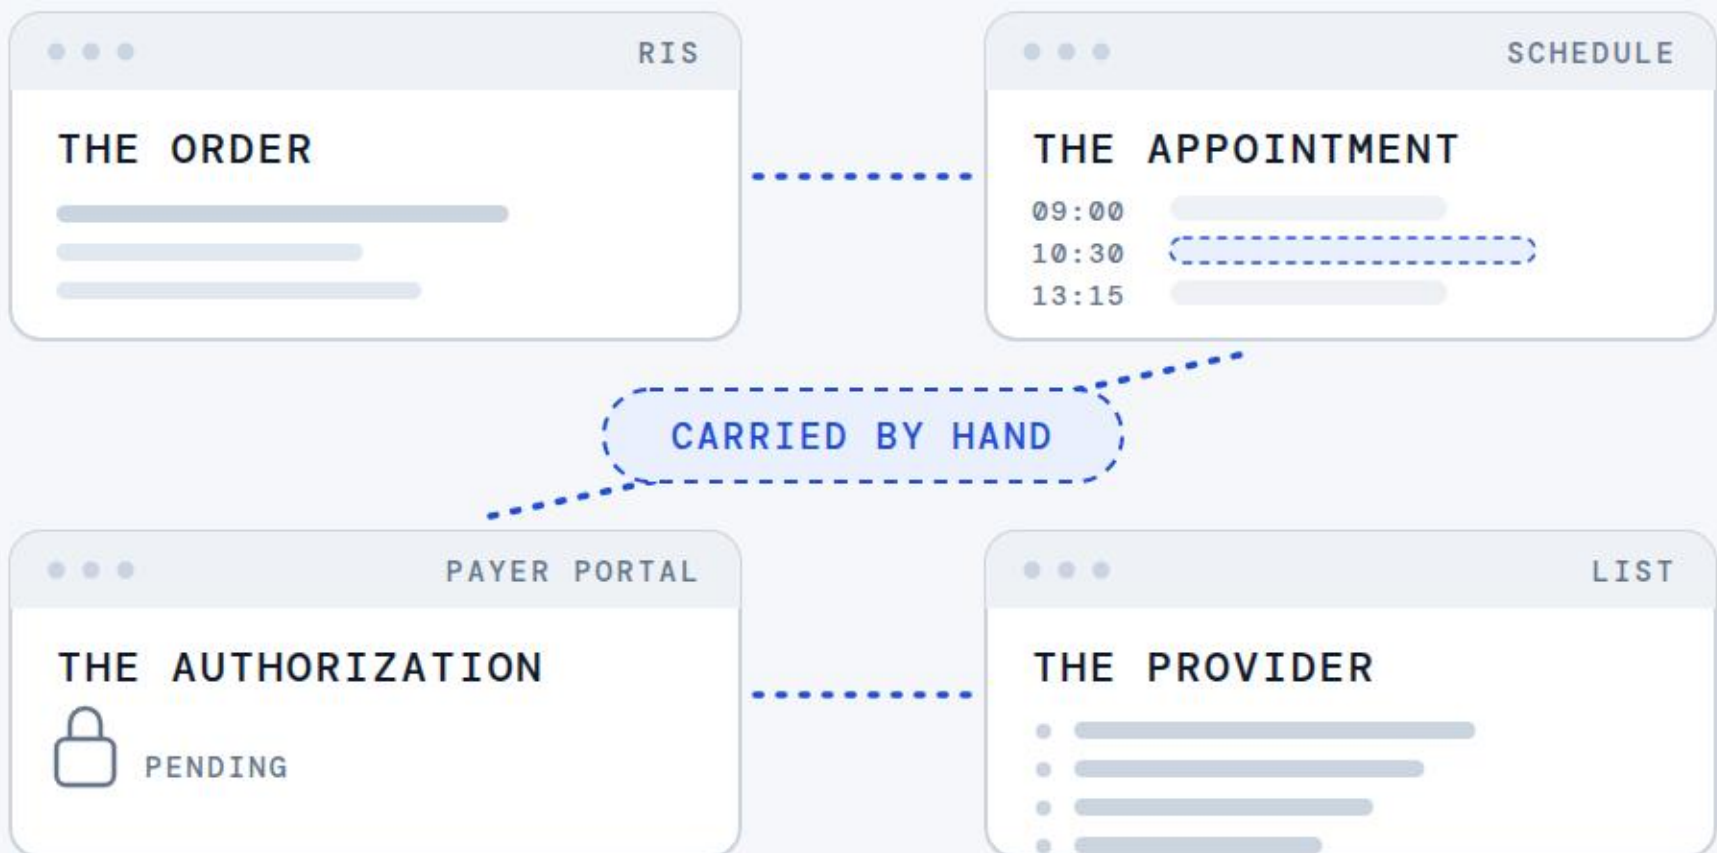

• — WITHOUT GRAVITY

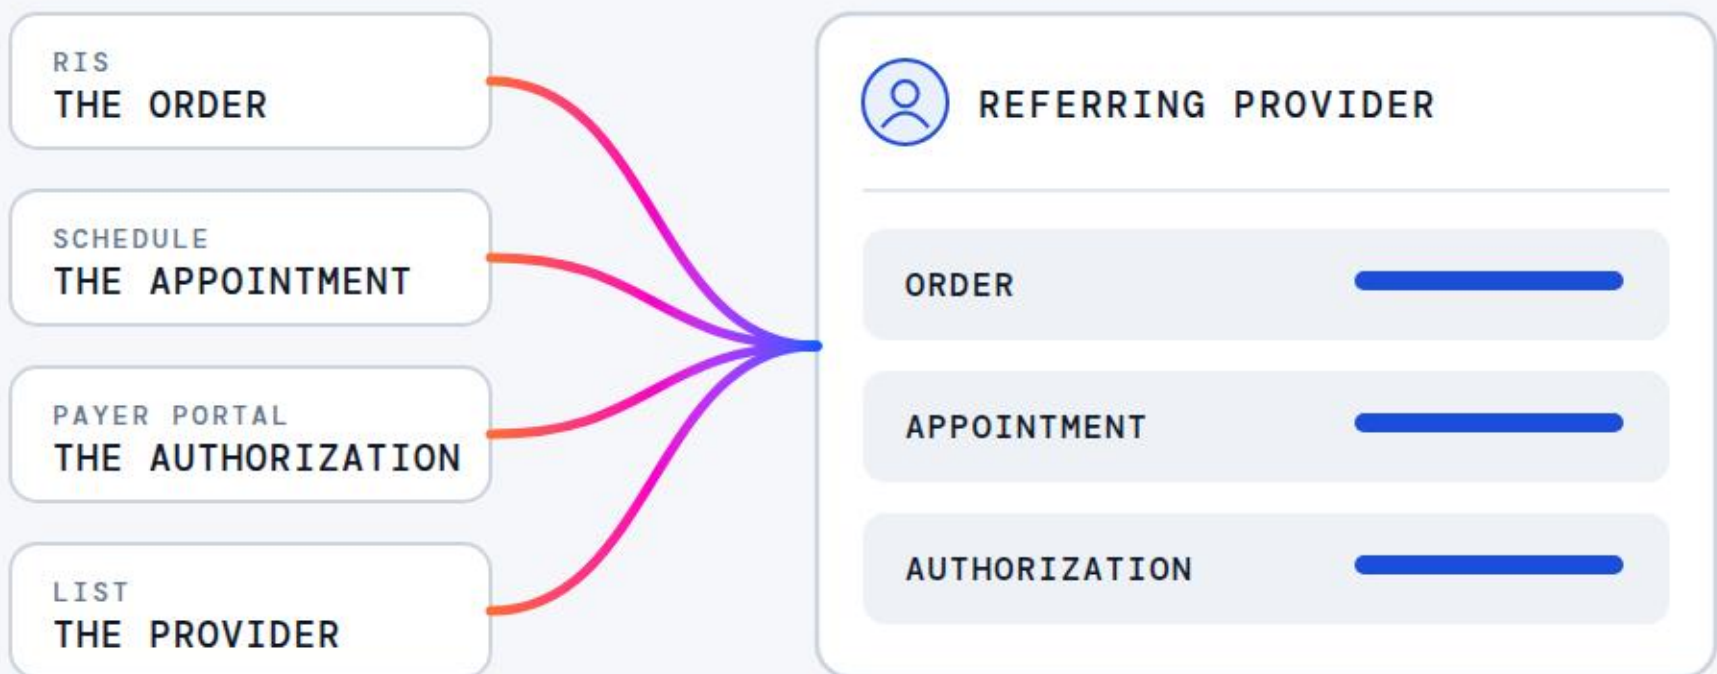

Four places. One relationship.

Nobody designed it this way. The answer gets carried between them by hand.

Gravity Grow puts it on **one record**.

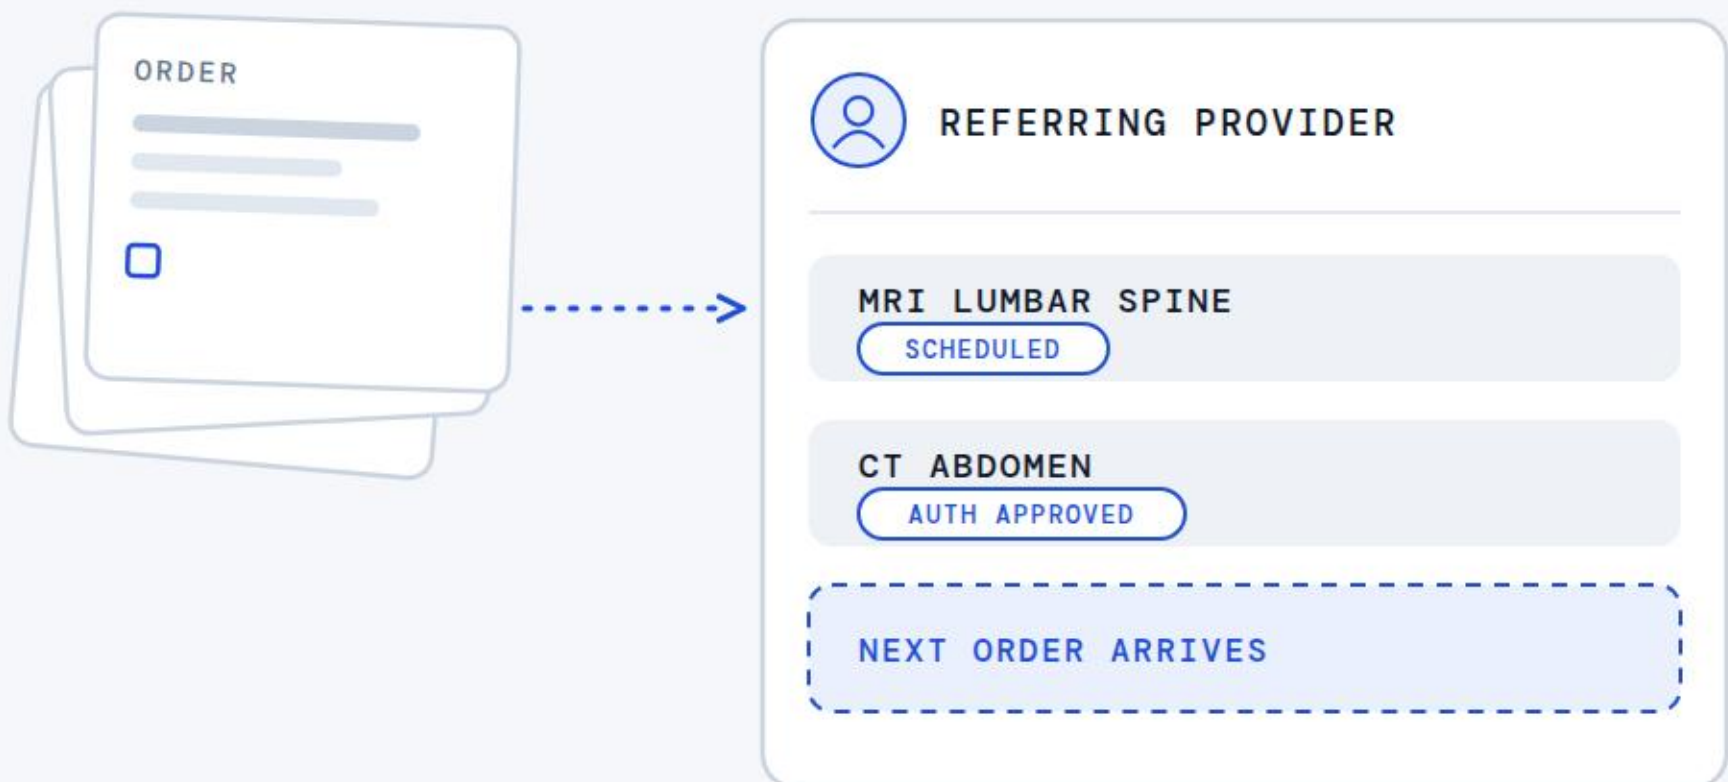

Each referring provider gets a referral history, built from the orders themselves.

• — WITH GRAVITY GROW

Built from the orders they sent.

Not a list someone keeps. Each referring provider's record fills from the orders themselves.

• — WITH GRAVITY GROW

One line per order

1

MRI LUMBAR SPINE
SENT MONDAY

2

SCHEDULED
TUESDAY 10:30

3

SAME LINE

1

Service and date

Which exam, and when the order was sent.

2

Appointment status

Whether the order became an appointment.

3

Authorization result

On the same line, not in a separate portal.

• — WITH GRAVITY GROW

How are we doing with this office? Ask the orders.

Not a guess. Not a phone call.
